

FORGE Phase 1 · Week 2 · Session 4 — Media Insert

For the facilitator. Use alongside "Session 4: Thinking Controls Behavior" in the Phase 1 Facilitator Guide.

Download the videos: forgementors.org/media.html

Session 4 as written already runs the full two hours (10 + 10 + 40 + 30 + 20 + 10 minutes), so the run of show adds no outside talk (an optional one is listed below). Its two short videos take about four and a half minutes of teaching time. They carry parts of the Instruction and Practice segments that you would otherwise say aloud, so every segment keeps its length.

What's in this insert

- **Video 4A, "Thinking Controls Behavior"** (2 min 24 s). The big idea in the guide's words ("Your thinking controls your behavior"), the Think-Feel-Act cycle one link at a time, and the dorm example of Man A and Man B side by side. It ends on "What was different between Man A and Man B?" and holds it for 20 seconds.
- **Video 4B, "The Thinking Report"** (2 min 5 s). The five columns, the guide's chow-line sample filled in column by column, how a different thought changes the whole chain, and the instructions for the exercise. It ends on "Write two thinking reports from your own life" and holds it for 20 seconds.
- **No talk in the run of show.** The session is already full; an optional talk is listed below for a make-up session or a segment that runs short.

Run of show (120 minutes)

Time	Segment	Min	Notes
0:00	Opening Circle	10	As written: how are you doing, and how did the service challenge go?
0:10	Review & Reflection	10	As written. End on the guide's line "Today we're going to learn why."
0:20	Instruction: The Think-Feel-Act Cycle	40	Video 4A plays at the start of Part 1 (2½ minutes). It covers Part 1 and sets up Part 2's example. When it stops on "What was different?", let someone answer (they should say "the thought"). Then pick up Part 2 at "The thought. That's it." and ask "How many times have you been Man A?" The video gives back most of Part 1's ten minutes; spend them on that question. Draw the cycle on the easel anyway, so the men can copy it. Part 3, Automatic Thoughts, as written.
1:00	Practice/ Exercise: Thinking Reports	30	Hand out the blank templates, then play Video 4B (2 minutes) in place of reading the five columns and the sample aloud. It ends on the exercise prompt: start the 20-minute clock when it does. Circulate as written. Men who finish early start a third report.
1:30	Debrief & Discussion	20	As written.

Time	Segment	Min	Notes
1:50	Checkout & Assignment	10	As written.

Notes on the videos

- **Part 3 is yours.** Neither video covers where automatic thoughts come from ("These thoughts made sense at some point in your life. They were survival strategies."). That part lands better said by you, in person.
- **Man A and Man B are shown as cards, not acted out.** The only argument on screen is a few seconds of two men arguing while a third steps between them with open hands. Nothing physical happens.
- **Keep your own samples ready.** Video 4B walks through the guide's chow-line report. Have your two or three prepared samples on hand for men who want a second example.
- **Privacy.** The video does not repeat it, so say it yourself: nobody reads anyone's thinking report without permission.

Optional talk (if time allows)

Session 4 already runs the full two hours, so this talk is **not** in the run of show above. Use it for a make-up session, when a segment runs short, or as preparation for yourself.

Kelly McGonigal, *How to make stress your friend* (TEDGlobal 2013, 14 minutes 15 seconds). A health psychologist explains how the way you *think* about stress changes what it does to your body, the Think-Feel-Act cycle in a different setting.

1. She says the same pounding heart did harm mainly to people who believed stress was harmful. Walk it through the cycle: what is the situation, the thought, the feeling, the consequence?
2. Think of a moment in here when your heart was pounding. What was your automatic thought about it? What changes if the thought is "this is my body helping me rise to this challenge"?
3. She says reaching out to others under stress, to get support or to help someone, makes you recover faster. What would that look like in your dorm this week?

Preview note: she cites studies on stress and the risk of dying, including heart attacks; there is no graphic imagery.

Licensing. TED talks carry a Creative Commons BY-NC-ND license. TED's usage policy says a single talk used in one lesson is generally permitted, with credit to TED. It also says a talk used as a standing part of a curriculum across many sessions or cohorts "may require a separate license," and that talks should not be scraped from TED's site. FORGE repeats every cohort and the prison has no internet, so write to TED (help.ted.com, licensing) for an offline copy for a nonprofit, no-fee, in-prison program. Show it whole and unedited, with TED's title card, and check it against the facility's rules for outside media.

Playing the videos without internet

Download both videos from forgementors.org/media.html onto the playback device before the session. They are FORGE's own videos, so there is no outside license to ask for, and they can be shown to every cohort. Check them against the facility's rules for media like anything else you bring in.

Checklist additions

- ☐ Videos 4A and 4B loaded on the playback device and tested with sound
- ☐ Blank thinking report templates handed out before Video 4B plays
- ☐ Easel paper or board ready to draw the Think-Feel-Act cycle
